Waterfall?

Erik Jan de Wit

Agenda

- ⦿ Introduction
- ⦿ Nokia test
- ⦿ Misconceptions of SCRUM
- ⦿ Benefits
- ⦿ Conclusion

Nokia test

- ◎ Level 1
 - ▶ Sprints time-boxed (4 weeks or less)
 - ▶ Software features tested and working at end of iteration
 - ▶ Sprints start with Agile specs

- ◎ Level 2
 - ▶ You know who the product owner is.
 - ▶ Product backlog available prioritized by business value.
 - ▶ Product backlog items estimated by team.
 - ▶ Team generates burndown charts, knows their velocity.
 - ▶ No interruptions from outside the team.

Myths and misconceptions of SCRUM

- ⦿ SCRUM is not a project methodology
- ⦿ No need to document anything

Scrum is great, except when it isn't

- ⦿ Using the process wrong
- ⦿ Blaming the messenger
- ⦿ Being impatient
- ⦿ Not adapting the process
- ⦿ Using the wrong process
- ⦿ What to do when Scrum doesn't work

Agile fundamentalist

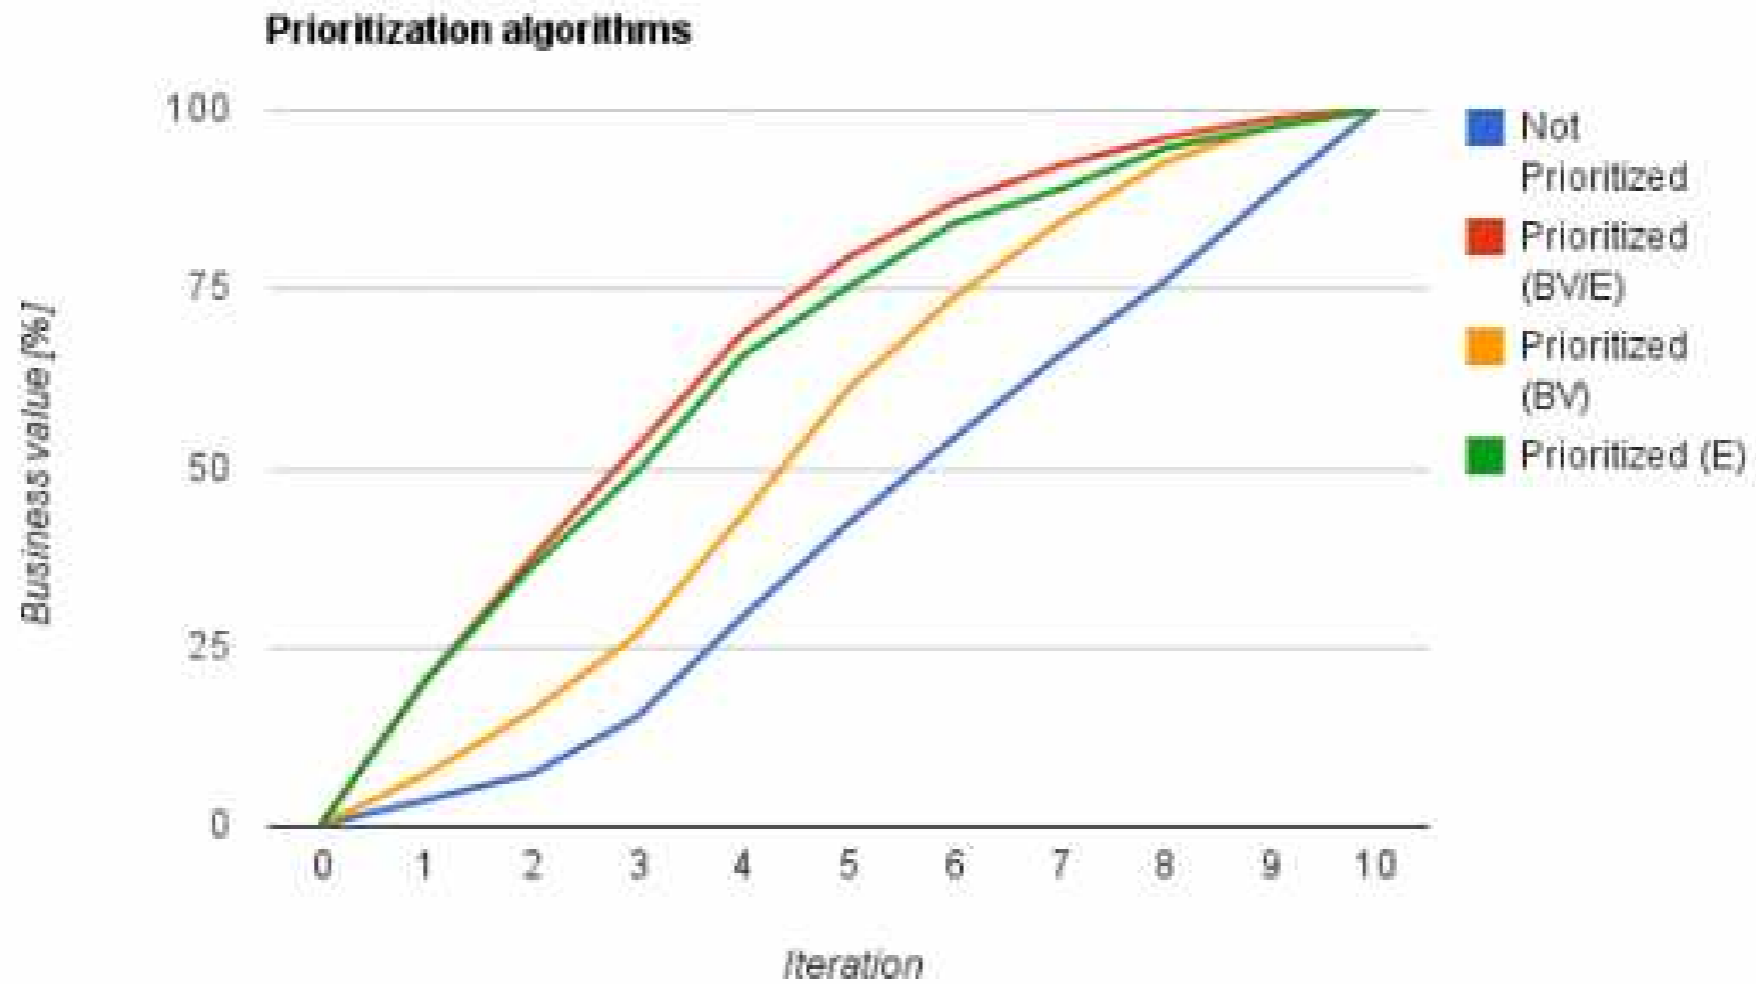

Benefits of SCRUM

- ⦿ Quickly respond to change
- ⦿ Highest business value first
- ⦿ Predictable transparent planning
- ⦿ Working product at the end of each sprint

Performance boost

- ⦿ Sorting on business value
- ⦿ Removing impediments
- ⦿ Focus on not wasting time

Algorithms result
